

# TimeMate V1.1

© 2005 by Roman Keller

## Change Log

- Improved GUI
- Two more tools added (Time to go and Birthday Calculator)

## Features ?

- It's a tea- or a parking timer, a birthday- and a time to go calculator.

## Where to get the latest version ?

You can find the latest version on [www.romankeller.ch](http://www.romankeller.ch)

## Where can you get support ?

I can only support you in my forum on my website and not by email.

## How to install ?

First install Opl\_Runtime.sis on your Nokia 9500/9300 and after that install MediaServerOPX.sis and TimeMate\_11.sis. It's very important that you install it in this order, otherwise an error will occur.

## Licence ?

TimeMate is Guestbookware !

But I would be very glad about your guestbook entry on my website or a donation.
